Examiner's Detailed Office Action

1. This Office is responsive to application 10/711,191, filed August 31, 2004.
2. Claims 1-19 have been examined.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1-12 and 13-19 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter: mathematical abstraction and/or algorithm. Claims 1-12 claim a "neural network" which is clearly a computer related manufacture. Claims 1-12 do not recite a data structure such that structural and functional interrelationships between the data structure and the computer software and hardware components, which permit the data structure's functionality to be realized, are defined. Thus the claims are merely a descriptive listing of the structural and algorithmic components of the neural network claimed, which are clearly mathematical abstractions. Claims 1-12 are therefore, non-statutory under 35 U.S.C. 101.

Art Unit: 2121

Claims 13-19 claim a “method of training a neural network” which is a process reciting the judicial exception of: algorithm. Claims 13-19 recite no associated physical transformation and the final result of claim 13,

summing the first summand and the additional summands, wherein, in estimating said derivative, paths from said second node to said output node that involve said third plurality of directed edges are not considered

is not a specific or substantial result to any problem, other than perhaps, the termination of the training algorithm. Therefore claims 13-19 do not recite a useful, concrete, and tangible real-world result. Claims 13-19 are considered to have no practical application and to recite no more than the 101 judicial exception of: algorithm. Claims 13-19 are therefore non-statutory under 35 U.S.C. 101.

Applicant should note that no prior art has been applied to the claims. No opinion is expressed with regards to the patentability of the claims over any art in this office action, since applicant's response to the rejection under 35 USC 101 should impact the scope and applicability of any art to the claims.
